

Physician Engagement Program

HCA® Physician & Provider Relations

Clinic based Information & Technology Lead contact information for PPR Growthlink Entry

The purpose of this form is to capture the key IT Leaders at each customer clinic and to enter the information into Growthlink for tracking and communication purposes. If IT&S at HCA can help identify these local leaders, PPR can help to centralize issue resolution and customer satisfaction in the field. We can also do a better job on reporting our successes and best practices to the entire division and nation.

Please provide the PPR representative for the respective clinic with the key contact information. Your PPR representative will then enter the key information into Growthlink on your behalf.

THANK YOU for your efforts to continually provide best in class service to our customers.
